Felipe Mantilla

Electronic Engineer - Full Stack Software Developer

HERE'S MY STORY:

I am a well-rounded Electronic Engineer and Full Stack Developer with extensive experience across a wide range of programming languages, from low-level languages like assembler for hardware programming to high-level frameworks such as React and React Native. I specialize in system design, architecture, and database modeling, and I'm committed to staying current with emerging technology trends.
Recently, I've been working on advanced AI integrations, building multi-agent systems using LangGraph and experimenting with Anthropic's Model Context Protocol (MCP) servers. I'm passionate about leveraging artificial intelligence to create intelligent, scalable, and future-ready solutions.

WORK EXPERIENCE

Gorilla Logic - Solutions Architect 1

GORILLA LOGIC
APRIL 2025 - PRESENT

AI-focused accelerating workflows across client accounts through practical AI. I partner with Solutions Engineering to lead legacy-to-modern code migrations, automate system documentation, and run innovation sprints that surface high-impact improvements. I also evaluate emerging AI tools and help define a repeatable methodology for applying AI across engineering, product, and operations.

Gorilla Logic - PurePM - (Full Stack Engineer)

GORILLA LOGIC
APRIL 2023 - 2025

As a full-stack developer, I've led enhancements to our app using modern technologies like TypeScript, Vue 3, GraphQL, Sequelize, and Postgres. I built a communication hub by integrating the Gmail API and designed a scalable architecture leveraging PubSub patterns and asynchronous workflows.
Lately, I've been deeply involved in integrating AI capabilities into our systems using Python, TypeScript, OpenAI, Anthropic, LangGraph, and LangChain. These tools have allowed us to build intelligent multi-agent systems and context-aware applications that enhance automation, improve user experience, and support complex decision-making processes.

Gorilla Logic - BetQL - (Full Stack Engineer)

GORILLA LOGIC
APRIL 2022 - MAR 2023

As a full-stack developer, I made comprehensive improvements to the entire app, with a focus on enhancing the chat section. I added new features such as emoji reactions, a streak leaderboard, SEO optimizations, and various system upgrades.

Tech Team Leader / Sr Full Stack Developer

KEYBE
AGO 2021 - APRIL 2022

- Frontend developer with NuxtJS (TypeScript)
- Backend developer with NESTJS, (TypeScript, GRPC, GraphQL)
- Other technologies : DevOps with Kubernetes environment into AWS, using docker environment for develop, and use GITLAB CICD.

Sr. Full Stack Software Developer

KEYBE
MAR 2021 - AGO 2021

- Frontend developer with VueJS
- Backend developer with Nodejs (Express)
- Other technologies : Integrate different systems for monitoring software, and develop internal software to make it easier the develop process

TECHNICAL SKILLS

- Angular 2+ / Vue JS 3 / Nuxt / ReactJS
- React Native / Flutter / Vue Native / IONIC / Xamarin
- NODEJS / Express / NestJS / Loopback4
- Typescript
- PHP / Laravel
- Python
- C#
- Docker / Kubernetes / CICD / AWS / Google Cloud
- Firebase / MongoDB / MySQL / MariaDB
- LangGraph / LangChain / AI Agents
- Python
- Anthropic MCP

MY PORTFOLIO

https://enruana.github.io/fm-portfolio/

Full Stack Software Developer

ATOM
NOV 2020 - AGO 2021

- Frontend developer with Angular 11
- Backend developer with Firebase, (cloud functions)
- Other technologies : Create component libraries for angular, google analytics, mix panel.

Full Stack Software Developer

QENTA SAS
AGO 2020 - DIC 2020

- Frontend developer with VueJS, Laravel AngularJS.
- Movile Apps developer with React Native and Vue Native
- Backend developer with Laravel, NodeJS, SqlServer
- Other technologies : Docker, Microservices with Express gateway.

Full Stack Software Developer

STEFANINI SYSMAN SAS
JAN 2020 - DIC 2020

- Frontend developer with Angular 7
- Movile Apps developer with React Native
- Backend developer with JAVA, NodeJS, SqlServer, mongoDB.
- Other technologies : Create sysman CLI, and package of componentes for Angular 7. Integration with Leaflet

Software and hardware developer engineer

OTTIS COMUNICACIONES
JAN 2019 - JAN 2020

- Frontend developer with Angular 5,6,7. PHP, Pure HTML,CSS,JS.
- Movile Apps developer with IONIC
- Backend developer with C#, NodeJS,MySQL, mongoDB.
- Other technologies : programming on C, microcontrollers like microchip, TI, raspberryPi, Onion. embedded systems prototyping

Electronic support engineer

VIA 40 EXPRESS
OCT 2017 - JAN 2019

- Desktop Software developer with C#, windows Forms and MySQL.
- Movile Apps developer with Xamarin
- Other technologies : Embedded systems prototyping, maintenance communication systems, and measurement systems of a tunnel (Intelligent transport systems). Used different data communication protocols like MODBUS-RS235-RS422, Serial ,SNMP, among others.

EDUCATIONAL INFO

Electronic engineer

UNIVERSIDAD PEDAGOGICA Y TECNOLOGICA DE COLOMBIA

-2010-2017
- Knowledge on Power electronics, radio communications, control systems, programming microcontrollers, PCB prototyping, and Networking

Instituto Bolivar Ubaté

TECHNICIAN ON SPORTS
2001-2009
